

Egg-shaped Cradle

This color-popping reading room for kids fully utilizes the fragmented area under a just-finished condo in a most elegant manner. Wavy borderlines of the silhouette were designed to oversize the perceptible space, with a flow of hues surrounding the giant sapling that represents the earth, the grass ground, and the boundless sky. It is a safe playground for young minds to discover all the surprises, and a lofty hall for little explorers to dig into the wonder world of stories.

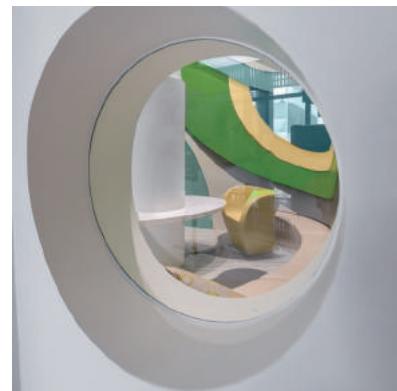

The wavy borderlines of the silhouette were designed to oversize the perceptible space, with a flow of hues surrounding the giant sapling that represents the earth, the grass ground, and the boundless sky. As the floor, the organic shaped carpets not only provide a safe play ground for children but represent the natural beauty of flower and plants.

Inside, the giant white tree rises straight out to the ceiling and connects the vivid waving curves. The wavy borderlines of the silhouette were designed to oversize the perceptible space, with a flow of hues surrounding the giant sapling that represents the earth, the grass ground, and the boundless sky. As the floor, the organic shaped carpets not only provide a safe play ground for children but represent the natural beauty of flower and plants. It is a safe playground for young minds to discover all the surprises, and a lofty hall for little explorers to dig into the wonder world of stories.

The kid's room locates in front of an open lounge in a just-finished condo, for the convenience of babysitting adults in the lounge. This color-popping area was conceived from the concept of vitality of a hatching egg. The white-and-ellipse elevation from outside represents the egg shape. And the round opening plays as a cabin window which one can peep through to, full of a sense of curiosity.

The white-and-ellipse elevation from outside represents the egg shape.
