INTERASIA VISION

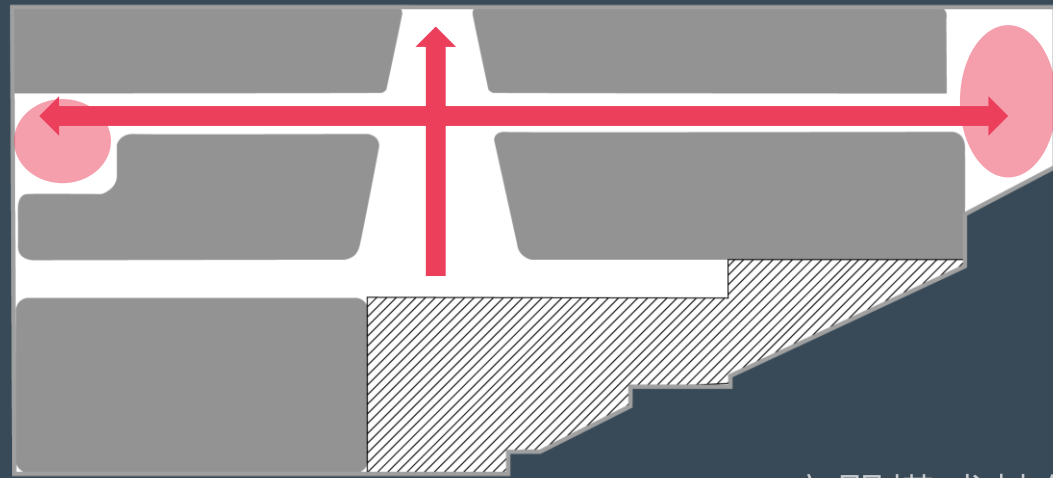

Concept

以貨輪作為空間雛型的發展概念，抽象的表現出船體 / 艦橋的空間形式，另外使用企業LOGO類似於七巧板的概念，塑造出符合該企業CI的視覺效果

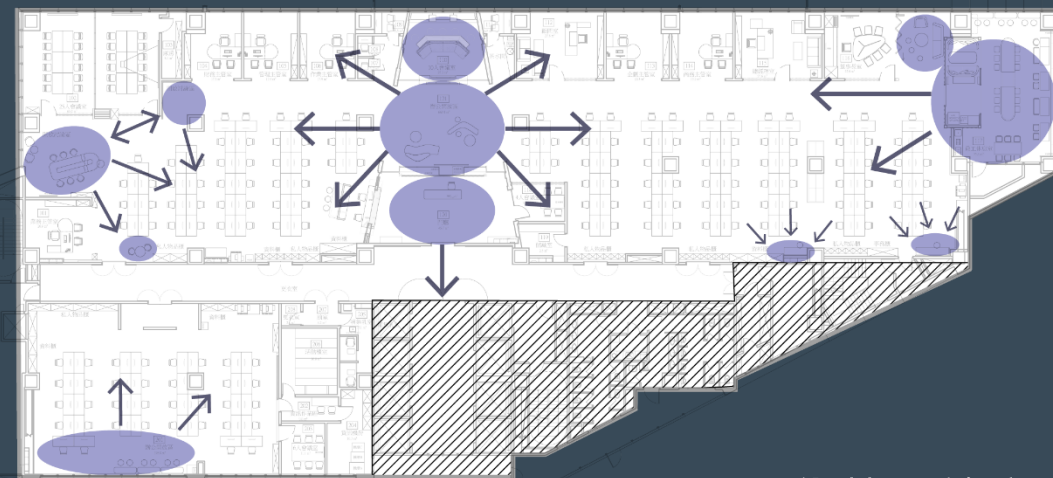

Drawing inspiration from the concept of a cargo ship, we've developed the spatial layout to abstractly represent the form of the ship's hull/bridge. Additionally, incorporating the company logo in a manner akin to a puzzle piece, we've crafted a visual aesthetic that aligns with the company's corporate identity.

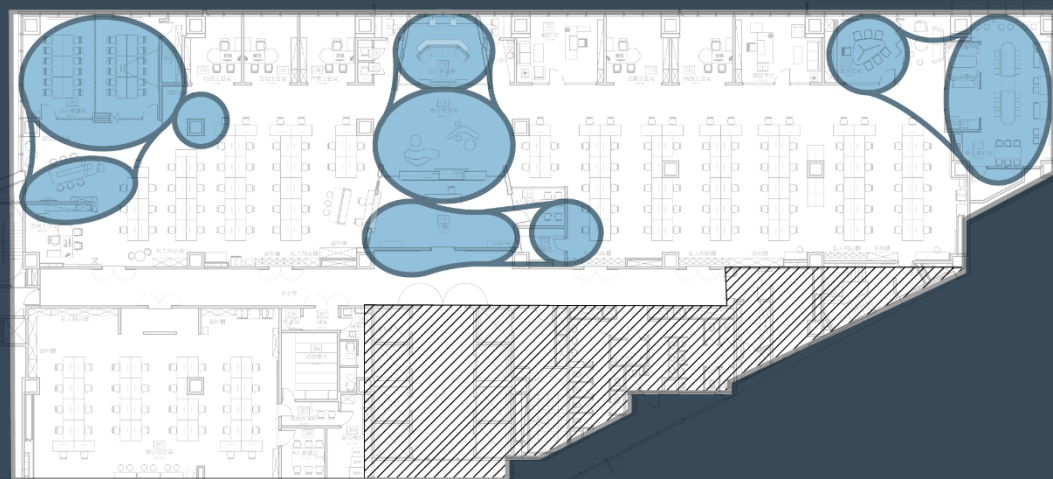

Corporate Identity

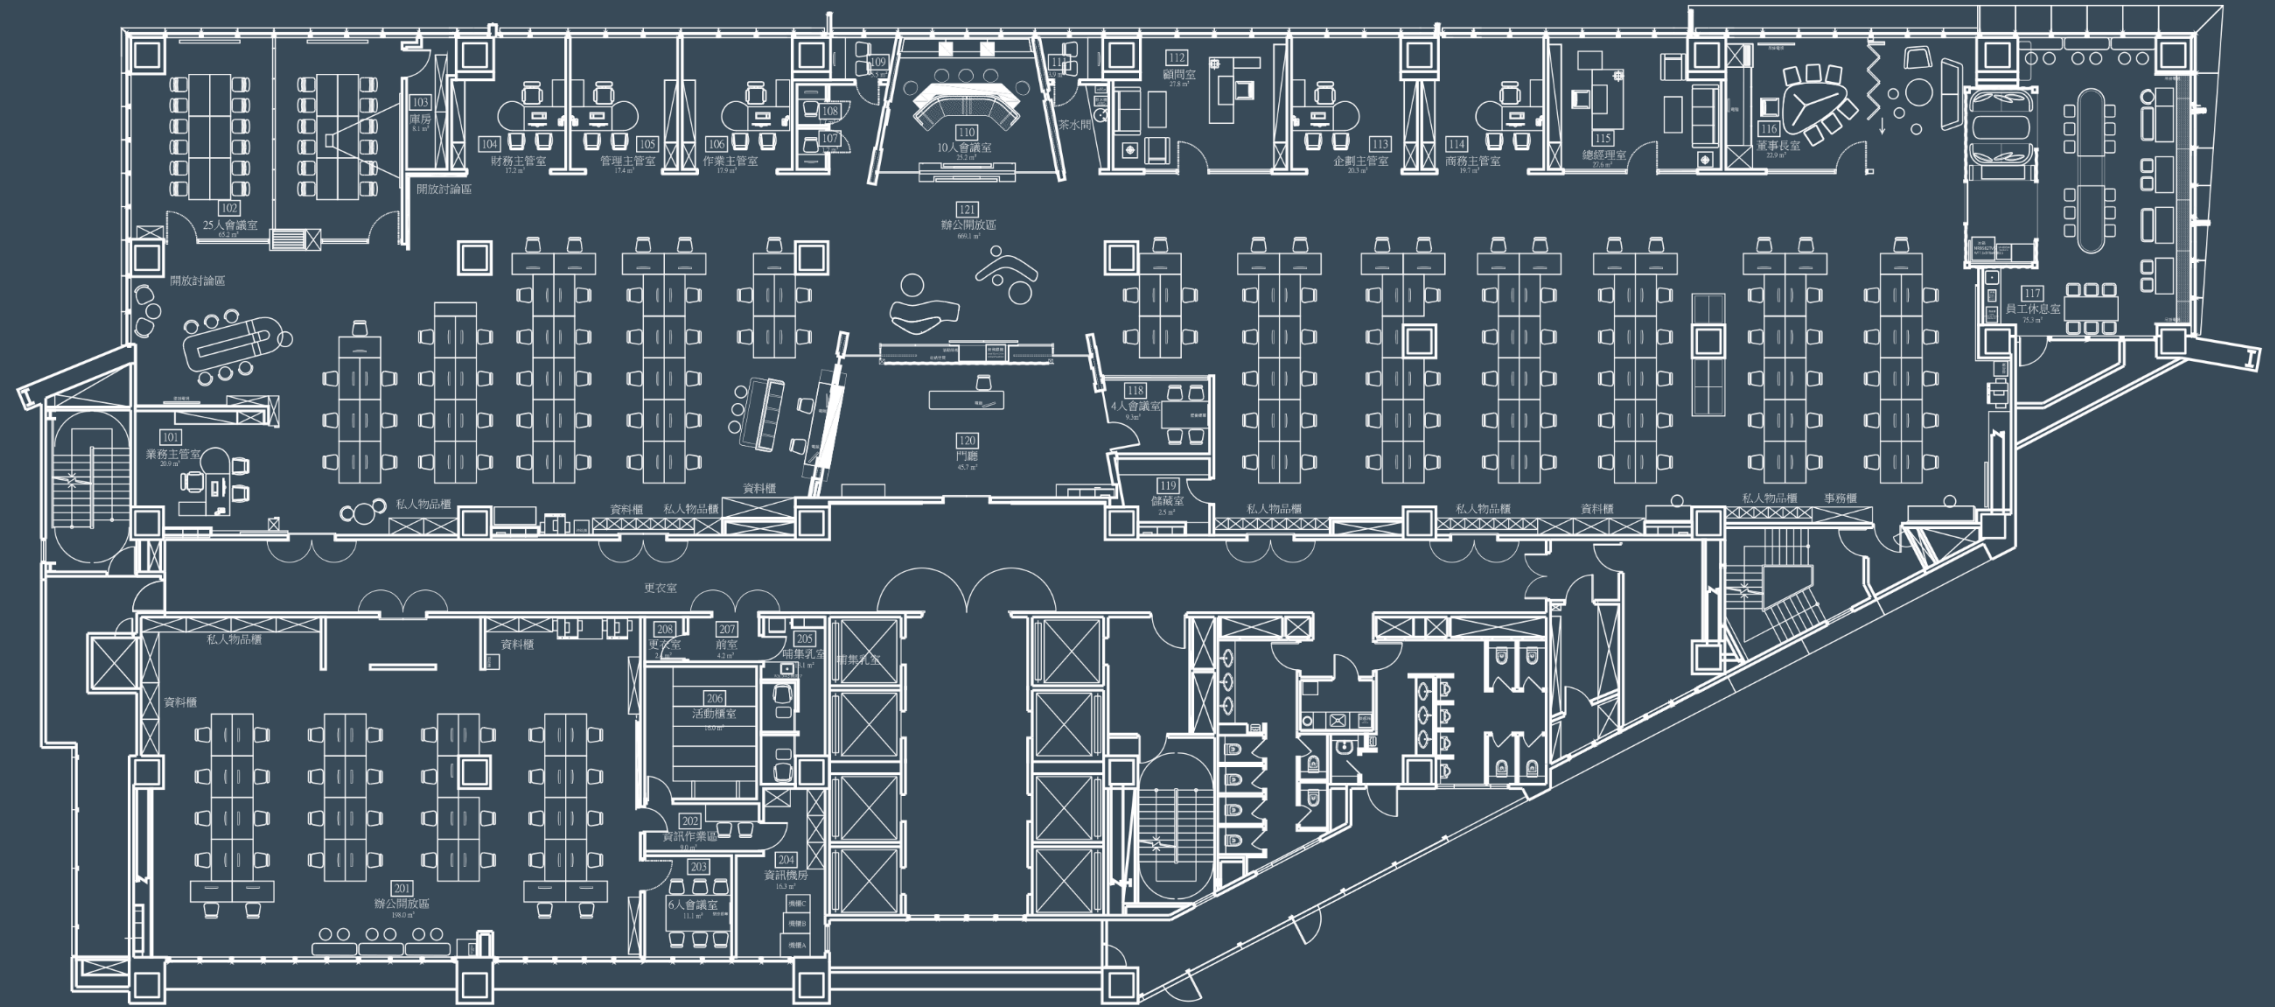

◆空間構成軸線

◆公共開放空間

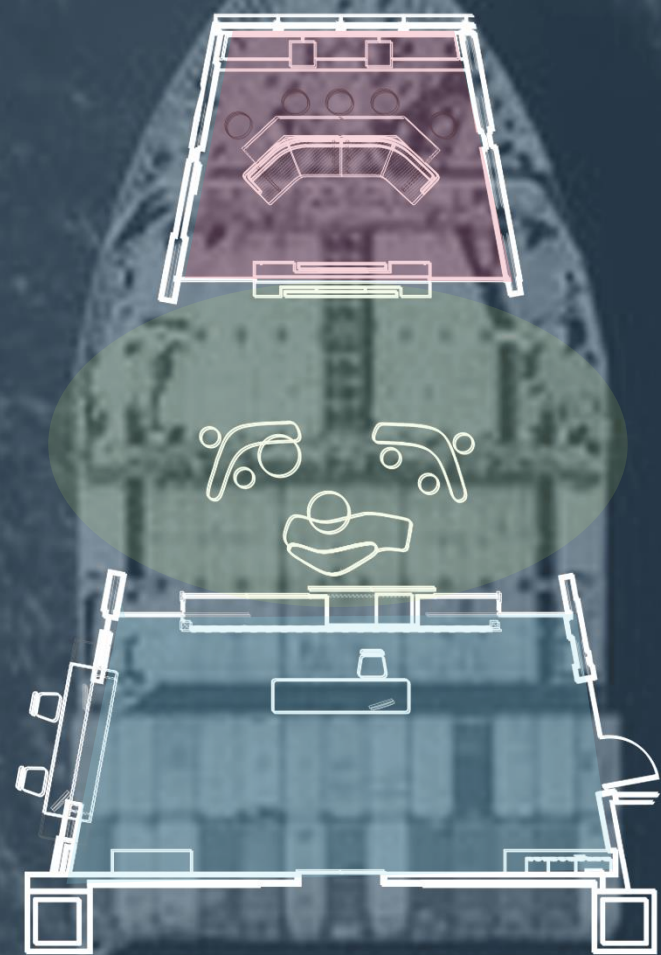

◆開放空間整合

平面的空間架構，主體是以中央進入，中央為企業CI主題的軸線(短軸/形象軸線)，左右沿伸為動線發展的軸線(空間序列/左右端點軸線)。空間中開放 / 多用途的區域也多分布在中軸區和左右二側的端點。

The spatial layout is predominantly planar, with the central entrance serving as the main axis aligned with the corporate CI theme (short axis/image axis). Extending from the central axis are the axes for the development of circulation (spatial sequence/left and right endpoint axes). Open/multi-functional areas within the space are also distributed predominantly along the central axis and at the endpoints on both sides.

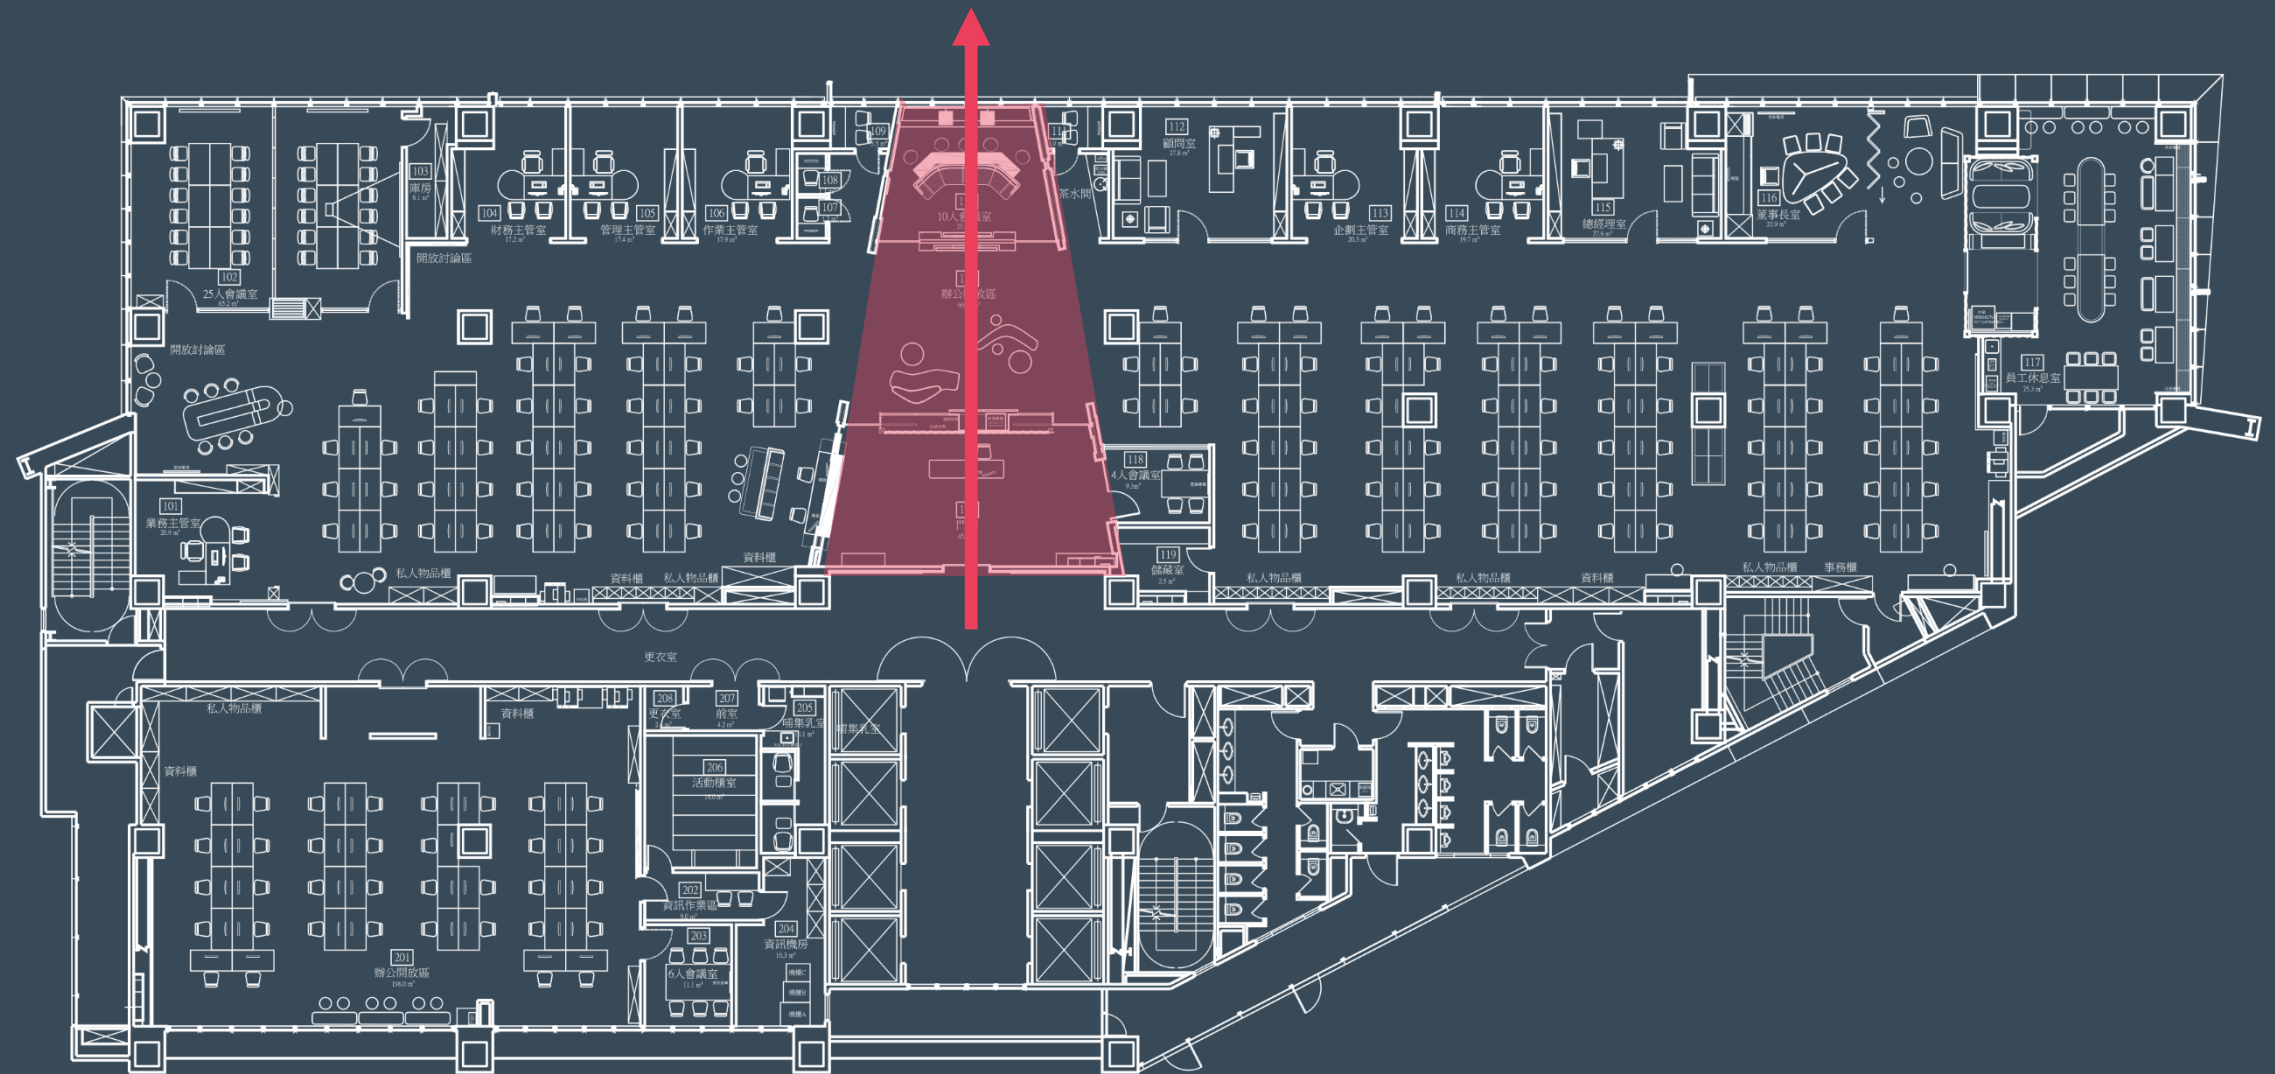

Concept – Spatial Composition

◆企業戰略討論 — 艦橋

◆休息 / 會談 — 活動甲板

◆接待 / 中控 — 控制室

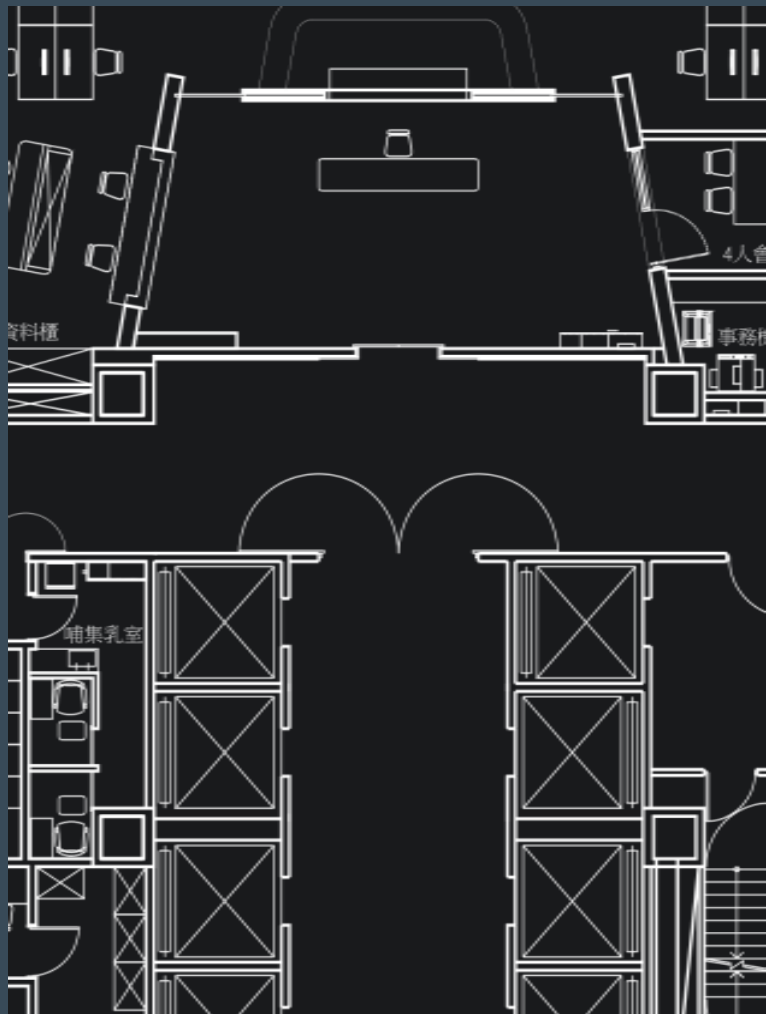

Y向軸線的空間架構，以中央入口進入**第一進**接待區，在空間架構和機能上類比於船艙的控制室，為人員與設備的中央控制區。**第二進**類比為開放活動甲板，機能上供同仁活動休憩和動線，**第三進**為類比船隻的決策中心也就是艦橋，機能上為創意與決策的討論空間。

The spatial structure along the Y-axis begins with the central entrance leading to **the first section**, the reception area, which is conceptually akin to the control room of a ship, serving as the central control zone for personnel and equipment. **The second section** is analogous to an open activity deck, providing space for colleagues to gather, relax, and move around. **The third section**, akin to the decision-making center or bridge of a ship, functions as a space for creative brainstorming and decision-making discussions

Concept — Spatial Device

以LOGO角度斜線為概念，構成具有光澤表面的大片主題牆面，另一側設置大型影像(具有發光性)

Utilizing the diagonal angle of the corporate logo as a concept, we've created a large thematic wall with glossy surfaces. On the other side, a large-scale display screen is installed (with luminous properties).

Entry

Counter / Casher

接待櫃檯，兼具作業座位和收納櫃的機能。船單出納櫃台為90公分高的櫃台形體。二個櫃台同樣以木紋與白色顆粒紋理人造石構成為基材，加上燈光及浮雕/廣告切割物造型

The reception counter serves as both a reception desk and a storage cabinet. The cashier counter is a 90-centimeter-high counter form. Both counters feature wood grain and white artificial stone, enhanced with lighting and cutout advertising designs.

位於大廳的會議/會客空間，提供訪客會面或討論使用

The meeting/guest space located in the lobby provides an area for visitor meetings or discussions.

Conference

開放空間設置**企業形象螢幕**，可播出企業形象影片或相片輪播，並在特定時間或活動時，可做為影像主題牆。

In the open social space, there is a corporate image display screen set up, capable of playing corporate image videos. It can also serve as a thematic video wall during specific times or events.

Information Wall / Event area

座位的型式有沙發 / 高腳椅 / 沿窗長凳，為多樣性討論的空間

The seating options include sofas, high stools, and along-window benches, providing a diverse space for discussions.

Conference

延伸自門廳 / 開放空間的形象牆面進入**多功能會議室**，構成為一體三進的軸線空間，當拉門開啟時，可以與門廳和開放空間連為一氣

The image wall extending from the foyer/open space into the multipurpose conference room forms a unified three-part spatial axis. When the sliding door is opened, it seamlessly connects with the foyer and open space.

高階主管辦公室 / 部門主管辦公區的正面長向立面，使用木紋質感、灰色調烤漆框玻璃，視線高度設置與船舶相關工程圖圖像的霧面玻璃貼，做視線遮擋。

The facade of the executive offices/departmental management areas features a wood grain texture, grey-tone frames with glass. Frosted glass panels depicting engineering diagrams related to ships are positioned at eye level to provide visual privacy.

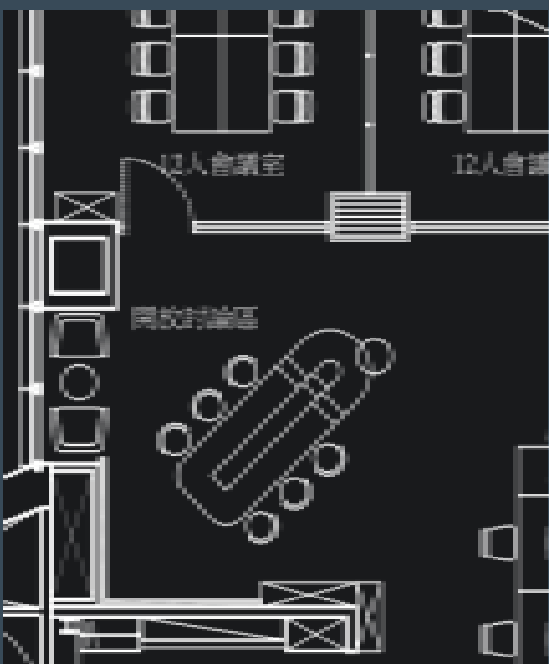

Partition wall

大會議區外設有休息/討論的前區，提供同仁討論 / 與會外賓休息或會議間的討論需求。討論牆面旁轉角設有開放圖書櫃供同仁使用

Adjacent to the main conference area is a front area designated for relaxation and discussions, catering to both colleagues' discussion needs and providing a space for external guests to relax or engage in meeting discussions. Additionally, there's an open bookshelf situated at the corner next to the discussion wall for colleagues to utilize.

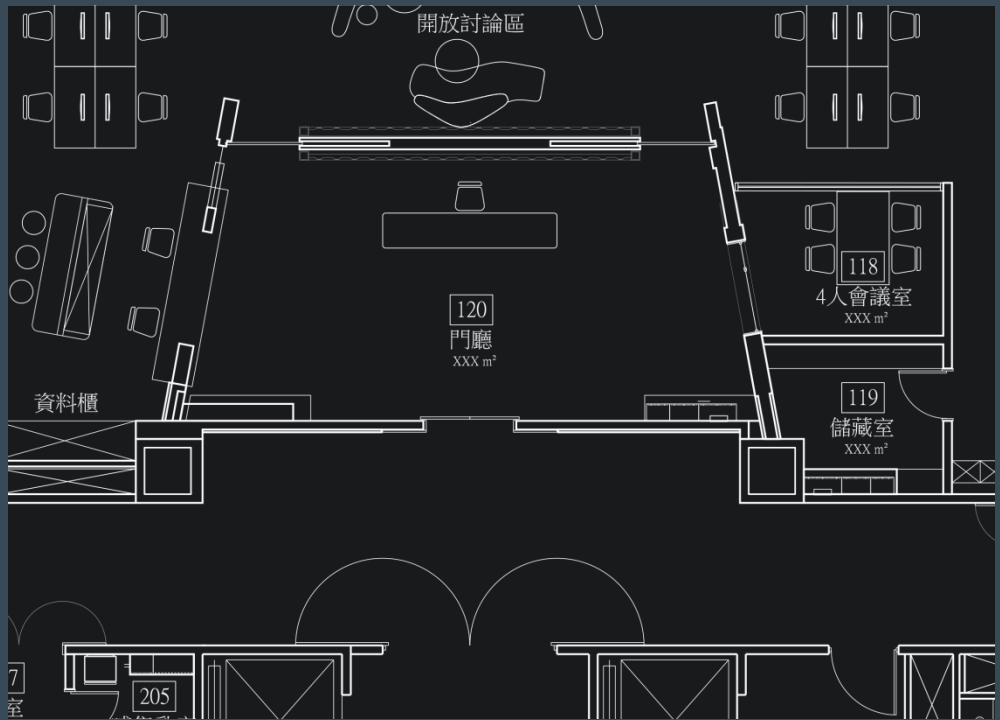

Open Discussion / Library

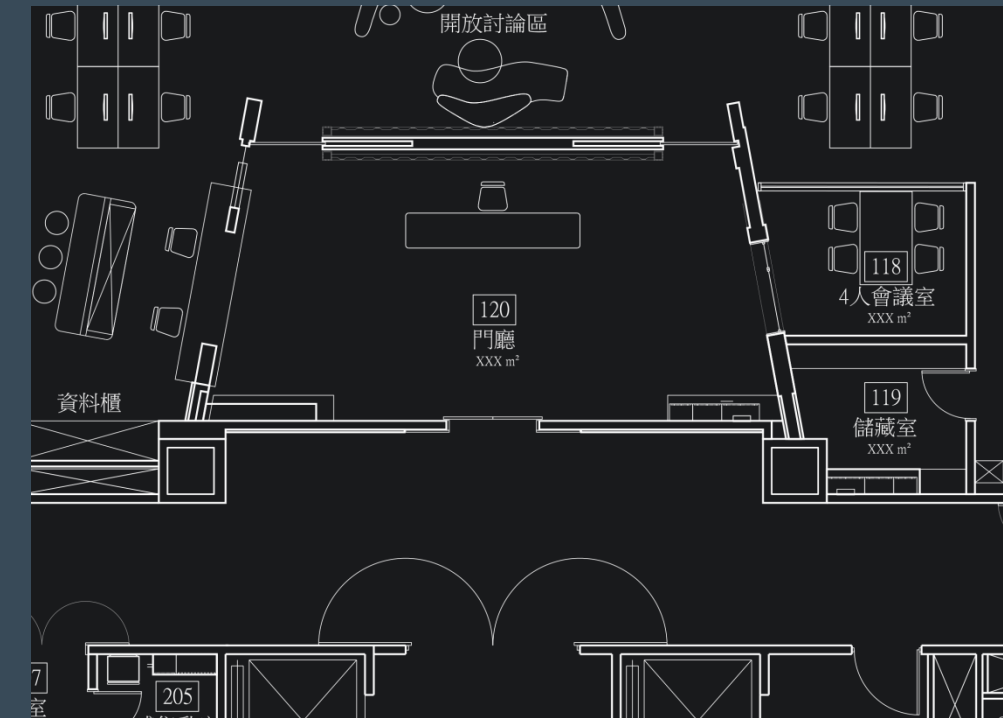

3D Simulation &
Completion **Photo**

以LOGO角度斜線為概念，構成具有光澤表面的大片主題牆面，另一側設置大型影像(具有發光性)

Conceptualized with the diagonal angle of the CI logo, we've designed a large thematic wall with glossy surfaces. On the other side, a large-scale lighting box screen is installed (with luminous properties).
