

此為高樓層住宅規劃案，縱深28米長，四面臨窗，有光、有風、晨曦、日落，光線與雲彩和太陽相陪襯。利用自然景致帶進室內的大好視野，發想了“在雲裡的家”。

It's a high-rise residential interior design plan. The residence is 28-meter in length. It has windows on each side of home, and it also has a great view to the sun and cloud. Based on the house with the great natural views, the designer came up with the design idea "home in cloud" .

行雲琉光

Lighting In The Waves

空間為兩戶住宅打通的居所，在橫向長方的格局裡，將七間臥房往兩邊橫短軸的方向配置，公共空間如：玄關、客廳、餐廳、輕食區、書房與視聽室集中於屋內中央，讓公私活動空間明確分野，並利用一條長縱軸貫穿全屋，作為主要行走動線。

The home is the 2-connected households with the rectangular layout. The 7 bedrooms are located on the sides, and the public area including the entryway, living room, dining room, light meal area, study room and audio-visual room is located in the middle space of the house. The private and public areas are explicitly distinguished, and the main traffic flows are designed to follow the rectangular layout.

在此軸線上，設計了波浪型天花板，一方面整合成列的大小梁，一方面呼應自然意象，讓天花板的微伏曲線與戶外自然光一起浮載。

The wave-like ceilings not only integrate the structural beams, also agreeably correspond to the natural imageries, thus the undulating structure of the ceiling artistically resembles the light waves.

餐廳牆面依著天花板線條分割，將牆與門做虛實的疊襯，並嵌以光條，以布紋飾面包覆凹凸不一的面牆添賦立體感。

The curved lines are consistently extended from the ceiling to the wall in the dining room. The consistent design of walls and door, on which the recessed linear lights and the stylish fabric wallcoverings intensify the stereoscopic sense.

另一端景的書房牆面，承接了天花線條做垂直降落至底的安排，書房前端安置一白色鐵件書架，其縱橫切割，依著美好的比例進行，以伺光影傾注於此。

The study room's wall, a vista on the other side, congruously conformable to the ceiling lines. The linear book racks of the white iron bookcase, in front of the study room, exhibits the gorgeous scales and reflects the delicate lights.
