Color blocks are specifically chosen to attain a harmonious space that stresses on the continuity in design, which connects and leaves an impression of one's manners of living.

The warmth of the interior is created with the use of wood. The cabinet's color reflects that of the wall, extending the width of the TV wall. Sunlight faintly passes through the curtain before extending in the interior. The overlapping of light and shadow gives out a feeling of life flowing in space.

Furniture is strategically placed as an idea of scalable color blocks filling up the entire room. This reflects the texture and order of the whole design.

Detail

The holed plate is placed in view at the end of the walkway to make the TV wall appear more abundant and interesting, as the height and position of the shelves can be adjusted based on personal preferences. Anyone can interact with the TV wall and use it flexibly by applying decorations.

The line along with the space brings about visual continuity with proper color ratio that is vivid, yet not overly complicated. It displays a fresh and clean visual sense in the whole interior.

Open the book of memory and enjoy a pleasant time together.
