STREAMLINED BUILDING

In order to reflect the sense of fashion, art and avant-garde design, the designer blends the curve with the geometric shape and forms a streamlined building with a sense of technology and future. It breaks the traditional concept of Founder architecture and integrates streamlined fashion design into architectural design so that the whole building looks like a streamlined ocean wave..

The project is divided into two floors: the first floor is an outdoor art plaza and a reception hall with art and culture combined here. There is an independent art and culture hall and a liquid concept coffee shop. In addition, it is equipped with a city meeting room, tea house, elderly health center, chess and card room, children's talent classroom, fitness center and other functional spaces for people to engage with each other. The second floor is the exhibition center and vip reception room. The collection of various functional spaces enriches the shared living experience and lifestyle of the community.

The beauty of the curve

Streamlined building

The designer combines curves with geometric shapes to create a streamlined architecture with a sense of technology and future, breaking the traditional concept of Founder architecture, incorporating streamlined fashion design into the architectural design, making the building full of rhythm and modern aesthetics like ocean waves.

The streamlined texture of the metal creates an exquisite and intimate atmosphere. With the smart design of the LED strip, it shows a simple and fashionable space temperament. The design of the modern art aesthetics hall and multiple functionally interactive spaces with people and culture presents the contemporary humanistic fashion atmosphere.
