Ronald McDonald House Charities

T A I W A N

在規劃「高雄麥當勞叔叔之家」初時，基金會希望延續「出門在外的家」的願景，藉由這個精神去發想整個設計。

「家」是一個溫暖、舒適、明亮、安全、簡單但又賦予孩子趣味及想像的空間，因而整體設計環繞著這幾項要點來進行。

外觀以簡單俐落的線條及明亮多彩的色塊賦予老房子新的面貌；一樓局部退縮創造出一個前院，麥胞牆及塗鴉畫做為迎賓的角色設立在此處歡迎來入住的家庭，另有接待區及辦公室，二樓為公共空間包含客廳、遊戲區、餐廳及廚房；三至六樓為客房，每個樓層都有小客廳及自己的主題色，房間內以木質為底材，搭配溫暖的顏色及輕鬆舒適的壁紙營造氛圍；誠心的希望能讓入住的每個家庭都能擁有這個「出門在外的家」。

When brainstorming the design for the Ronald McDonald House in Kaohsiung, RMHC directed that the space should be considered a “Home Away from Home”. The concept of Home: a place with warmth, comfort, and safety, it can be a simple space but with some hints of playful characteristics.

The project is a re-image of an old office block. It is retro-fitted to comply with current codes and in-process of becoming a certified sustainable building. The exterior design added warm, colorful blocks, with simple contour lines that frame the private and public spaces. The ground floor was set back to create a covered outdoor space that welcomes visitors with artworks created by McDonald employees and local school children. The ground floor also houses a reception area and offices. The second floor consists the main “living spaces” for families to cook, dine, converse, and play. Third floor and above are individual rooms with bathrooms. Each residential floor has a color scheme that’s flanked by warmth from wood and patterned wall coverings. Each space is infused with warmth and comfort for all families while nourish their loved ones back to health.
